COLLEGE IS A TIME OF DISCOVERY AND SELF-DISCOVERY

DECIDING ON YOUR MAJOR INVOLVES BOTH

Look inward to gauge your interests, academic strengths and personal goals. And look to UCLA to provide the rare opportunity to explore all the new subject areas and learning experiences only a research university in an innovative global city can offer.

This booklet will introduce you to broad subject areas at UCLA. You’ll see some familiar fields of study and some new ones. And you’ll see that here, it’s not just about what you study but how you study it.

As you consider different majors, keep in mind that UCLA offers a multitude of ways for you to pursue more than one interest and expand your thinking while working toward your degree.

EXPLORING NEW FIELDS
During New Student Orientation over the summer, your advisor or counselor can help you choose courses that will introduce you to new academic fields. With 10-week fall, winter and spring quarters, you have a lot of flexibility to sample new subject areas.

SMALL SEMINARS AND INNOVATIVE COURSES
Our Fiat Lux seminars give groups of 10–20 students an in-depth look at compelling topics, like global migration and the psychology of food and eating. Clusters are small, yearlong courses taught by teams of faculty from different disciplines. While examining one current topic, Clusters expose freshmen to different schools of thought and approaches.

MINORS AND DOUBLE MAJORS
If you have a wide range of interests, a minor or a double major may be the way to go. Minors can complement your major while adding to your skills. For instance, one student majored in African American studies and minored in accounting; he was hired as a financial analyst before graduation.

Double majors let you earn a degree in two fields. They require a larger course load but can be worthwhile. One graduate, for example, double-majoried in business economics and Chinese to prepare for global business.

UNDERGRADUATE RESEARCH
UCLA is a research powerhouse, averaging $1 billion in research funding annually. So, it’s no surprise that more than half of UCLA students graduate with research experience. And not all research happens in labs: Social science and humanities students do original research as well, from analyzing the costs and benefits of DNA databases to identifying the influences of Victorian Gothic literature on online games.

INTERNSHIPS
From Silicon Beach to Hollywood, Los Angeles offers an array of internship opportunities for students pursuing all different majors. You can gain meaningful real-world experience and make valuable connections while translating your passions into career skills.

VOLUNTEERING, ENTREPRENEURSHIP AND MORE
By volunteering for groups like Mobile Clinic, L.A. Hacks and Bruin Consulting, you can explore your civic-minded interests and build a robust résumé. Startup UCLA offers programs including Bruin Impact and Summer Accelerator that hone your entrepreneurial skills. Student organizations offer another avenue for you to shape your UCLA experience.

STUDY ABROAD
Many UCLA students earn course credit outside the U.S. UCLA offers 100+ programs in more than 40 countries. Financial aid can help make study abroad affordable.
INTERESTED IN THE WAY THINGS WORK

If you have a talent for numbers or you like to take things apart — with your hands or in your imagination — you may find your major in the PHYSICAL SCIENCES or ENGINEERING.

SHARPEN YOUR SKILLS
The physical sciences are known for rigorous measurement and testing of hypotheses and theories. Students learn to handle big data as easily as lab equipment. Engineering is even more hands on, with an emphasis on practical problem-solving.

SHAPE YOUR FUTURE
Physical sciences and engineering graduates are in demand. So many employers recruit our students that UCLA’s Engineering and Technical Fair, a two-day event, is repeated twice a year. Some graduates end up in surprising places. The team that created the algorithm for the snow in Disney’s Frozen and the water in Moana included both an alumnus and a professor of applied mathematics.

IMPACT YOUR WORLD

DESAINATION. Engineers at UCLA invented the first practical way to convert saltwater to drinking water in 1959. Today, UCLA researchers are using nanotechnology to improve the membranes that filter the water. A cross-disciplinary team of all-star faculty is committed to making Los Angeles 100 percent sustainable by 2050.

BIOELECTRONICS. Bioengineering researchers at UCLA recently developed an ultra-thin, rechargeable fiber battery for potential use in wearable health-monitoring technologies. The zinc-ion device is lightweight and environmentally friendly.

INFINITY AND BEYOND. Faculty and alumni are involved with many NASA missions, from Dawn to Mars 2020 to Europa Clipper. Astronaut Megan McArthur ’93 was the robotics expert on the final space shuttle mission to the Hubble Telescope; today, she is the pilot of the NASA SpaceX Crew-2 mission to the ISS, launched on April 23, 2021. Undergraduate students designed, built and launched the ELFIN satellite to conduct research into space weather.

A sampling of majors (see pages 14–15 for a complete list):
Applied Mathematics
Biochemistry
Computer Science
Electrical Engineering
Mechanical Engineering

Majors of growing interest:
Climate Science
Engineering Geology
Mathematics/Economics
Physics
Statistics and Data Science

Some intriguing minors in this area (see page 15 for a complete list):
Atmospheric and Oceanic Sciences
Biomedical Research
Climate Science
Data Science Engineering

Astronomer, Nobel Prize winner and TED star Prof. Andrea Ghez
Chemistry Prof. Neil Garg is known for creative teaching.
Comet expert Prof. David Jewitt takes students on a field trip to Kitt Peak Observatory.

The Concrete Lab is a research and instructional space for Civil and Environmental Engineering.

Bioengineering Assoc. Prof. Andrea Kasko focuses on the design of new materials for biomedical use.

The Student Creativity Center in Engineering
CURIOUS ABOUT THE STUDY OF LIFE AND HEALING

If you like to explore the secrets of living organisms or you feel passionate about improving the quality of life for others, you may find your calling in the LIFE SCIENCES or NURSING.

SHARPEN YOUR SKILLS

All life sciences and nursing majors learn critical thinking, analytical skills, research strategies and laboratory skills. Depending on your major and course choices, you may develop ease in data mapping or acquire specific clinical skills.

SHAPE YOUR FUTURE

Life sciences majors find jobs in research labs, biotechnology, pharmaceuticals or genetic counseling. Many go on to graduate study in neuroscience, medicine, dentistry and other health-related professions.

IMPACT YOUR WORLD

BRAIN RESEARCH: More than 50 years ago, UCLA became a leader in the then-new field of brain research. That’s one reason we identify psychology as a life science, not a social science: Our approach is grounded in neurobiology. UCLA’s graduate program in clinical psychology is ranked first in the U.S.

ECOLOGY: There’s an extensive botanical garden right on campus, an urban refuge for biodiversity. Further afield is the University of California’s Stunt Ranch Santa Monica Mountains Reserve, used for research and internships. Ongoing studies focus on how flora and fauna have recovered from a 1993 fire.

HOSPITAL: UCLA’s health science schools are on the main campus — and so is Ronald Reagan UCLA Medical Center, ranked the No. 1 best hospital in California and No. 10 in the world. That’s where our nursing students do their clinical immersion. Even more students are involved at the hospital as volunteers and researchers, especially in the biomedical research minor. And our medical school faculty teaches courses in the undergraduate neuroscience program.

A sampling of majors (see pages 14–15 for a complete list):

- Biology
- Nursing
- Psychobiology
- Psychology
- Physiological Science

Majors of growing interest:

- Cognitive Science
- Human Biology and Society
- Molecular, Cell and Developmental Biology
- Neuroscience

Some intriguing minors in this area (see page 15 for a complete list):

- Applied Developmental Psychology
- Biomedical Research
- Conservation Biology
- Evolutionary Medicine

苑香兰，分子、细胞和发育生物学教授 Tracy Johnson 专注于细胞如何调节其基因表达。
Perhaps you have a flair for business or politics. Or maybe you like understanding how institutions work — and why they don’t. You may find your focus in the SOCIAL SCIENCES or PUBLIC AFFAIRS.

IMPACT YOUR WORLD
INTERNATIONAL INSTITUTE. Founded in 1958, the International Institute is the central hub for global and area studies at UCLA, with more than 25 centers and programs promoting multidisciplinary research. Both a major and minor in global studies are offered.

QUARTER IN WASHINGTON: The University of California D.C. Center houses more than 250 students in a high-rise apartment building a short walk from the White House. UCLA students can do the Quarter in Washington program in fall, winter or spring — completing an internship and an original research project.

FIELD STUDY. Los Angeles offers many opportunities for research. But our students pursue field study all over the world: geography students in Thailand, anthropology students in Ghana and Bali, political science students in Sacramento. The Lemelson Anthropological Honors Program is only one of the field study programs in Social Sciences.

PROFESSIONAL SCHOOLS. The Luskin School offers a public affairs major as well as a minor in urban and regional studies. The Law School welcomes undergraduate volunteers to its moot court program. The Anderson School has a minor in accounting and courses for the entrepreneurship minor.

A sampling of majors (see pages 14–15 for a complete list):
Business Economics
Education and Social Transformation
History
Political Science
Public Affairs
Sociology

Majors of growing interest:
African American Studies
American Indian Studies
Chicana and Chicano Studies
Communication Studies
Gender Studies
Labor Studies

Some intriguing minors in this area (see page 15 for a complete list):
Entrepreneurship
Public Health

Intrigued by People and the Institutions They Create

Darnell Hunt, executive vice chancellor and provost, and professor of sociology and African American studies, co-authors a much-quoted study on Hollywood diversity.

Erica Henderson (International Development) and Melanie Mah (Psychology) participate in Quarter in Washington.

Logan Linnane (Geography and Political Science) does fieldwork in Thailand.

Prof. Lynn Vavreck, Political Science, studies presidential elections.
LOVER OF THE ARTS, LITERATURE AND CULTURE

Perhaps your passion is theater or painting. Or maybe you are thrilled by literature or language as a reader or a writer. You may find your major in MUSIC, the ARTS or the HUMANITIES.

SHARPEN YOUR SKILLS

At UCLA, performing and visual arts majors get a liberal arts background as well as specialized skills. Humanities majors hone their writing and research skills in English and in other languages. Digital humanities adds new dimensions: for example, mapping the cultural, architectural and urban history of a city space.

SHAPE YOUR FUTURE

Humanities majors embrace a wide range of careers, from business and academia to digital media content creation. Music major Sophia James wowed audiences on American Idol’s 18th season. She’s one of a long line of singers, actors and artists with degrees from UCLA.

IMPACT YOUR WORLD

MUSEUMS. With a focus on emerging artists, an extensive permanent collection and endless public programs, the Hammer Museum is a rich resource for art and humanities students. The Fowler Museum explores global arts and cultures — past and present — and offers paid student internships and courses like Textiles of the World.

PERFORMANCE. Students of the arts and humanities enjoy the Center for the Art of Performance (CAP UCLA), which hosts dance, music, spoken word, theater and experiential programming by leading artists from around the globe. The Geffen Playhouse, known for its mix of classic and contemporary plays, new works and musicals, partners with UCLA as an educational resource to offer students countless internships, workshops, student tickets and college nights.

FILM AND TELEVISION ARCHIVE. In the U.S., UCLA’s archive is second in size only to the Library of Congress. But it’s not just for film buffs. It’s a rich cultural history resource that includes the Hearst Metrotone News collection, with 27 million feet of newsreel footage from 1914 through 1968. Undergraduates can view holdings for research papers or capstone projects.

IMPACT YOUR WORLD

A sampling of majors (see pages 14–15 for a complete list):

Art History
Design | Media Arts
English
Music
Philosophy
Theater

Majors of growing interest:
Architectural Studies
Asian Humanities
Ethnomusicology

Some intriguing minors in this area (see page 15 for a complete list):

Digital Humanities
Film, Television and Digital Media
Visual and Performing Arts Education
**Shaping your UCLA experience**

These brief profiles show the many paths alumni follow to successful careers. Choosing a major is just one step. Explore your interests using all of the available resources at UCLA: undergraduate research, internships, student groups, study abroad and student jobs.

---

**MICHAEL REYES**  
**B.A. ’14**

**MAJORED** in English, minored in French and Francophone studies, UCLA College  
**NOW** holds a Ph.D. in comparative literature from the University of Texas, Austin, where he focused on Caribbean literature and African diaspora studies

**BEFORE UCLA,** left a violent public high school for Mexico. Finished school there, improved Spanish skills. Returned to the U.S. and obtained a G.E.D.

**AT UCLA,** entered as a transfer from Citrus College. Through the Civic Engagement program, interned at a literary agency. As a Mellon Mays Undergraduate Fellow, wrote an honors thesis exploring the theme of deserted islands as locations for producing social critique in literatures of the 12th and 18th centuries.

---

**GINA PRINCE-BYTHEWOOD**  
**B.A. ’91**

**MAJORED** in film and television, School of Theater, Film and Television  
**NOW** a screenwriter and director, most recently of The Woman King starring Viola Davis; on Time magazine’s list of the 100 most influential people of 2023

**BEFORE UCLA,** saw movies on weekends with her parents, played basketball and ran track in Pacific Grove, California, where she grew up

**AT UCLA,** planned to become a soap opera writer, but was overcome with the feeling that she was meant to direct when she was carrying equipment for a student film

**AFTER GRADUATION,** wrote for TV series including A Different World and Felicity before writing and directing her first film, Love & Basketball, which earned a Humanitas Prize. Strives to tell stories that reflect the experiences of women of color and challenge stereotypes.

---

**BRYANT NG**  
**B.S. ’00**

**MAJORED** in molecular, cell and developmental biology, UCLA College  
**NOW** head chef and co-owner of award-winning restaurant Cassia in Santa Monica, California; co-founder of L.A. Chefs for Human Rights (LACHR)

**BEFORE UCLA,** grew up peeling shrimp and washing dishes at his parents’ and grandparents’ restaurants in Los Angeles

**AT UCLA,** loved his major classes and planned to go into medicine. Eventually discovered his true passion, cooking. Now he applies principles he learned in lab class to creating recipes.

---

**LISA D. CAGNOLATTI**  
**B.S. ’83**

**MAJORED** in chemical engineering, UCLA Samueli School of Engineering  
**NOW** Senior Vice President, Customer Service, Southern California Edison; Executive-in-Residence, ASU W.P. Carey School of Business; and board member, Valley of the Sun United Way

**BEFORE UCLA,** a star student in math and chemistry at Inglewood High School. Discovered engineering through a UCLA program.

**AT UCLA,** a member of the National Society of Blacks in Engineering and Alpha Kappa Alpha sorority; lived and worked at Sproul Hall; interned with IBM and Proctor and Gamble

**AFTER GRADUATION,** earned an MBA from Pepperdine University. Started as a team manager at Proctor and Gamble, moved to Southern California Gas Company as an energy sales engineer. Worked her way up the corporate ladder.

---

**ANDREW CAMPION**  
**B.A. ’93**

**MAJORED** in economics, UCLA College  
**NOW** Chief Operating Officer, Nike, Inc. He’s also on the board of directors for Starbucks and the LA 2028 Olympic & Paralympic Games.

**BEFORE UCLA,** grew up in Whittier, California, and graduated from Whittier Christian High School

**AT UCLA,** became a member of Pi Kappa Alpha fraternity, played intramural volleyball and basketball, and went to nearly every football and basketball game

**AFTER GRADUATION,** earned a law degree and LLM in taxation. Worked about 11 years at The Walt Disney Company, where he held leadership roles in strategic planning, mergers and acquisitions, financial and operational planning, investor relations and tax. Earned his M.B.A. from UCLA Anderson in 2003, while at Disney. Joined Nike, Inc. in 2007.

---

**CARMEN ARGOTE**  
**B.A. ’04**

**MAJORED** in art, School of the Arts and Architecture  
**NOW** an artist whose work has appeared in group and solo shows in venues including the L.A. Convention Center, the Hammer Museum and New York City’s New Museum

**BEFORE UCLA,** grew up in the Pico-Union neighborhood of L.A. with her parents and sister

**AT UCLA,** entered as a transfer from Santa Monica College. Undergraduate work chosen for an exhibition in the Wight Gallery; also did a solo show.

**AFTER GRADUATION,** earned her M.F.A. from UCLA in 2007.

MAJORS AND MINORS

15
WHEN CHOOSING A MAJOR, YOU MAY FIND THAT YOU’RE NOT SURE WHERE TO BEGIN. MAYBE YOUR FAMILY HAS THE ANSWER, OR YOUR FRIENDS OR TEACHERS. OR MAYBE YOUR PATH SHOULD BE BASED ON YOUR INTERESTS AND SKILLS. PERHAPS NONE OF THAT’S AS RELEVANT AS YOUR PERSONALITY. REST ASSURED, ANY OR ALL OF THOSE COULD LEAD YOU TO THE RIGHT ANSWER AS LONG AS YOU ALSO LISTEN TO YOUR HEART, FOR THAT IS YOUR MOST TRUSTED ADVISOR. AND WHEN YOUR HEART JOINS FORCES WITH OUR HEART, YOU ARE SURE TO BECOME A FORCE OF NATURE AT UCLA.
